

The proposal to require broadcasters to record part or the entire broadcast day puts a costly burden on the smallest of broadcasters. My operation is KXIT AM-FM in Dalhart, TX and it's very hard just to keep the doors open let alone keep up with the constant changing of rules, regulatory fees that outpace inflation and my ability to raise advertising rates. The commission needs to give the owner operator the opportunity to make a living. Small broadcasters face challenges the major groups would never have to deal with.

The person who is making a complaint should be required to submit a recording or transcript. We have a staff of 2 and the proposed would be a major burden on this operation.

Thank you

George Chambers
